### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No.

6535766 in view of either Bradley et al #6262637, Yano et al #6198208 or Larson III et al. #6215375 or Vale #5291159.

Thompson et al disclose a medical implant device that includes a downlink communication channel. The telemetry circuits in the device uses a microelectricalmechanical filter. Not disclosed is the use of a thin film bulk acoustic resonator filter.

Bradley et al, Yano et al, Larson III et al and Vale all teach the use of a thin film bulk acoustic resonator filter in frequency selection circuits of mobile communication

equipment because of its size and reliability. Given these documents it would have been obvious to replace the microelectromechanical filter in Thompson et al communication device with a thin film bulk acoustic resonator filter as taught by either Bradley et al, Yano et al, Larson III et al or Vale to provide a sub-component that's small and reliable.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
